Software Engineer / Game Developer

vanadgir@gmail.com | (508) 615-8646 | Boston, MA

EXPERIENCE

Kalkomey Enterprises, LLC

Independent Contractor / Unity Engineer

January 2026 to June 2026

- Collaborated with Interactive Engineering Team for educational products like Boat-Ed+ and Ridgeline, supporting Android, iOS, and browser-based users across 30+ states
- Created custom Unity tools and tests to speed up workflows, improve the QA process, and reduce manual errors
- Owned high priority tasks end-to-end using ClickUp tracking and frequent communication via Slack

Self-Employed

Freelance IT Support / Consultant

April 2020 to February 2025

- Provided technical consulting across IT setup, web maintenance, and data analysis for small organizations
- Delivered lightweight data workflows, dashboards, and reporting tools using Excel, Google Sheets, and PowerBI

Beacon Pointe Wealth Advisors

Senior Associate, Operations & Technology

February 2019 to April 2020

- Maintained data quality between Tamarac and Salesforce CRM, while initiating up to 50 new accounts daily, managing over \$11 billion AUM across 24,000+ active accounts
- Directed the firm's quarterly reporting process by writing and distributing documentation, auditing and reconciling account performance issues, and assisting over 160 employees across 10+ nationwide partner offices
- Compiled and presented the firm's operations activity to the team of directors using PowerBI and custom Excel workbooks, providing visual insights into managed assets and cash flow for each office, advisor, and client

Findability Sciences

Analyst

October 2015 to February 2017

- Developed and scheduled SQL queries as part of the ETL pipeline into an MS SQL Server database, performing daily QA through log reviews, data cleaning, and feature testing to meet client's evolving needs and requirements
- Illustrated donor behaviors by creating a web dashboard with Highcharts, integrating social media activity from Twitter and Facebook into a unified visualization platform, ultimately boosting donor retention by ~15%
- Applied machine learning techniques such as NLP and sentiment analysis to summarize comments and reviews on clients' social media pages, and utilized regression models and decision trees to predict donations

EDUCATION

Boston University

Master of Science in Computer Science

June 2022 to January 2024

University of Massachusetts, Amherst

Bachelor of Science in Mathematics

September 2009 to May 2015

PORTFOLIO

MURDEER

February 2025 to Present

- Video game in active development that scored top 10% in fun factor for Bigmode Game Jam 2025
- Lead programmer for a small indie studio, owning gameplay systems, FMOD audio integration, and git workflow
- Built in-house telemetry pipeline and public web platform for market research and publisher outreach

three20

July 2024 to September 2024

- 3D tabletop dice rolling simulation built with Vite, using React-three-fiber and cannon.js physics
- Prioritized UX and performance with a simple interface and asynchronous asset loading
